Team work

PERSONAL PROJECTS

Graduation project : Mobile app diagnosis ECG
(2017 - 2018)

- People who suffer from heart diseases want to speed up the diagnosis. Diagnosis is something like ECG that takes time. The project idea is that we have an electrocardiogram (iot) device that is based on the heart readings and raises them as real readings of the base of fire clouds and after that I pull these readings and analyze using the ML model to classify the treated disease after the therapist And after him and send ECG to a doctor

COURSES

Flutter development

DART

CCNA Routing & Switching

Microsoft office

CERTIFICATES

Bachelor's degree of Computers and Information
