Learning Outcomes: 1-Reading: To extract specific information.		

Read the following film review and answer the questions below:

'Titanic' is the American epic!

It is really amazing that the old film '**Titanic**' still keeps its power every time you watch it. You feel the tragic **plot** in the sinking scene and the great hope to survive. The film, which wins many Oscar prizes, is **directed** by James Cameron. The two stars Leonardo DiCaprio (Jack) and Kate Winslet (Rose) show a great **acting**. They present that only the true love remains and survives at the end.

The **script** is very interesting and funny in places. When you watch the film, you will find that **the action sequences** are generally thrilling and well done. In addition to that, the exciting **special effects** create a real ship and a real sinking. Although the film takes place in one **place** only, it creates outstanding details.

There are many **good things** in the film. The great relationship between Jack and Rose and the willing to survive are unforgettable. In addition, the music is truly creative and romantic as it explains the tragic events. Although the film is very long, you will not feel the time while you are watching it.

The **worst thing** about the film was the death of Jack. The film could have a better ending if they survived and got married. Also, class differences were clear through the film including rooms, restaurant, services and parties. Overall, 'Titanic' takes the breath away from the beginning of the film to the ending. It is a fascinating film and I strongly recommend it.

Answer the following questions:

1. What type of film is "Titanic"?

.....

2. Who is the director of the film?

.....

3. Where does the film take place?

.....

4. What are the good things about the film?
